Skills

Frontend Technologies

- HTML
- CSS
- JavaScript
- Bootstrap

Backend Technologies

- C
- Java Programming
- SQL

General Skills

- MS Word
- Power Point
- Photoshop

Main Project

Object Detection Using Deep Learning

Object detection using deep learning provides a fast and accurate means to predict the location of an object in an image. Deep learning is a powerful machine learning technique in which the object detector automatically learns image features required for detection tasks.

Mini Project

Web Application | College Website

This project College System has been developed on HTML, CSS, and JavaScript. The main objective of developing this project was to create a static website for the College, from which users can get the details of the college, teacher, and student, such as about the college, contact details, address, images, etc. This project is in HTML and CSS so it's a static website and does not perform any type of dynamic database operations.
